

Letter of Recommendation for Chin Ao-Wen

3 February 2025

To whom it may concern,

I am writing to recommend Ao Wen, who served as an intern on our Data and AI Strategy team from August to December 2024. During his time with us, Ao Wen contributed effectively to our initiative focused on measuring and evaluating the business value of data platform investments.

Ao Wen demonstrated strong capability to work independently on assigned tasks. His self-directed learning was particularly evident in his mastery of Tableau, which he learned independently to create dashboards for tracking investment metrics and ROI indicators. He showed consistent resourcefulness in addressing challenges, particularly in developing frameworks to quantify both tangible and intangible benefits of data implementations.

In his role, Ao Wen contributed to analyzing investment performance data, evaluating implementation costs. He showed good initiative in researching industry benchmarks for data and AI-related investment returns. His ability to work independently while maintaining regular communication with team members was a notable strength. Ao Wen's consistent performance in completing assigned tasks enabled him to take on additional responsibilities when needed.

Based on his performance during the internship, I believe Ao Wen would be a valuable contributor to organizations focused on business intelligence and data analytics. His combination of technical understanding and resourcefulness makes him well-suited for roles requiring independent thinking and problem-solving abilities.

Please feel free to contact me if you need any additional information about Ao Wen's capabilities and contributions.

Sincerely,

Tricia Peh Soh Huey
