

Letter of Recommendation for Chin Ao-Wen

19 July 2024

Ao-Wen joined NLB as a Data Analytics Intern within NLB's Data Office, from 13 May 2024 to 19 July 2024. During his short 2-month internship period, Ao-Wen undertook a project to analyse NLB's mobile app data and feedback from their Customer Satisfaction Survey. His task was to provide insights that can help improve the user experience and present the findings to the relevant stakeholders.

Ao-Wen had shown adaptability in using the various analysis toolkits that NLB uses. Although he was trained in basic Python before joining as an intern, the various tasks required him to significantly expand his Python skills and knowledge, and he has been able to rise above the challenge. For the analysis of feedback data, we had tasked him to explore the use of LLMs to categorise the open text, which he had done a good job in. As this is fairly new to the team, Ao-Wen has demonstrated independence and the initiative to find out more.

Given the wide range of services that NLB has, Ao-Wen was proactive in finding out what each service was, be it through reaching out to the stakeholders to clarify, or to explore the mobile app himself. He had also helped to drastically improve the existing documentation for the use of Google Analytics data.

Throughout his internship, Ao-Wen has shown resourcefulness in making the necessary changes to his work quickly, and has demonstrated his ability to work under time pressure. On top of this tight schedule, he was also happy to help playtest for a card game that NLB was developing.

I am confident that he will excel in his future endeavours, and I look forward to the opportunity to work with him again.

Sincerely,

Desmond Chew
Principal Data Analyst
National Library Board
